hash tables: universal hash families.

dictionary hash

> Ochaining (hash 345) : 252 bum

- 30h bucket: 0372210E

hashtable zeal

Panyount = hash function universal

= OUT: key - value y sybball.

hash family

1) Pirect addressing mouzote bullenz 4 -> Were buckeralo) muyn

thoshtable: hash value of managen collision - othernalis.

> changez 35~.

Emon 1= 12= cm cmrst) = balanced O(1)

- number of Heins In solution: Randomness US bucket - hashfunction?

= 50 P 1 h(ui) = h(l) 14. LOHA 7601 75 4/2

= a uniformly random hash function

a pucketural 20to/14/14/1/2/7/7/12

- hash function

PTUK a prime not define

· hun = 12 mod n = 21% n y random. 4

जाशाम्य गड़े का काम.

D priect addressing 25 data of the Strate 21 Summary Pros: D(1) Insert / delete/search cons: large space required

@ hash table with chaining.

(small space) than fired addressing.

> Insert in our, search in occupyth (115+))

(3) hash function

: bemourent. (deterministic hash function)
